

MI39ARA/MI39AST

TECHNICAL DATA

Active Instrument Cables

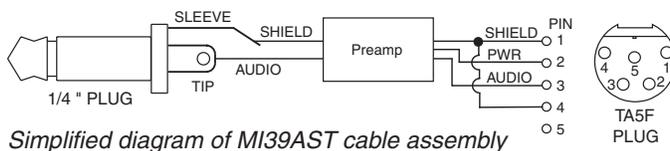

MI39ARA

MI39AST

- For use with all transmitters, including IM, LM, UM400, SM Series, SMa Series, LMa and UM400a models
- Available with straight or right angle plug
- Built-in JFET active preamp for optimum interface with instrument pickups
- Designed for musicians who demand rugged, high quality equipment and the best sound quality available.
- 30 inch overall length

Other cables available:

MI33PRA and MI33PST

Passive cable for high output active pickups and line outputs from keyboards and other audio equipment for all Lectrosonics transmitters with 5-pin input jacks.

Setup with the LMa transmitter:

Start with the input gain control knob on the transmitter between 10 and 11 o'clock for typical guitar pickups. Play at the same level that will be used during the performance and fine adjust the gain control knob so the -20 LED flickers red (indicating +0 dB) during the loudest passages.

Setup with the IM transmitter:

Start with the input gain control knob on the transmitter between 1 and 2 o'clock for typical guitar pickups. Then proceed to fine adjust the gain as described above.
